MAINTENANCE MANAGEMENT CONSULTANT SERVICES
(Orlando-Orange County Expressway Authority)

The scope of this work consists of providing professional services as a Maintenance Management Consultant (MMC) for engineering contract administration and management services for the maintenance of the Orlando - Orange County Expressway Authority's (OOCEA) roadways, bridges and utilities.

The scope of work includes the identification of deficiencies in pavement systems, roadway and signage lighting, roadside and overhead signage structures, drainage structures, fencing and other related roadway features. It also includes initiation of maintenance work orders for corrective action, using Florida Department of Transportation (FDOT) specifications and standards.

Other aspects of our work include the coordination between various Orange County, City of Orlando, and State of Florida agencies for the maintenance of the roadways operated by the Authority.
